THE STORY

Hello from the founder of FingerMonkeys!

First, I would like to thank everyone who has landed here and is reading more about our project FingerMonkeys.

Where does the name FingerMonkeys come from?

There are actual small monkeys on our planet that range from 10-20 cm in height. When they are young, they can hold onto your finger. That's how they got the name: finger monkeys. I knew instantly that this was the name I wanted for the game. I wanted to buy the .com domain in 2011, but it was very expensive at the time. So, I waited for my moment and finally secured it a few years ago.

I've been in the crypto world since 2017 (yes, I had heard of Bitcoin before but didn't pay much attention to it - silly me). Since then, I've been learning how everything works and meeting people in the crypto world. I've learned that there are some amazing people in this crowd, but there are also a lot of opportunists. That's why I only work with teams that know what they are doing and have a proven track record.

Having always been passionate about gaming, I had a childhood dream to one day create a game. That time has come now. With the right team and the perfect timing to be in the middle of the WEB2 and WEB3 gaming revolution during a Bitcoin halving year, my team and I are launching a project called FINGERMONKEYS.

The name itself is not intended to solely represent a game about monkeys. Of course, the first releases will feature those cute little monkeys. However, we view our name as a BRAND NAME. This means you will see the FingerMonkeys brand on a variety of products, including merchandise, toys, games, NFTs, etc.

As my final words, I would like to emphasize that I have spent some time searching for the right people to join my team and for collaborations. So, expect nothing but high-quality products, services, and support. I believe in providing excellent support to everyone who backs this project and believes we can take it to the moon.

Welcome to FINGERMONKEYS MOVMENT.

FINGERMONKEYS IN THE NUTSHELL

FingerMonkeys is a gamified platform where the **ambassadors** upload simple mini games, while players enjoy a TikTok-inspired experience of scrolling through those games, playing and earning **FingerMonkeys token**. Ambassadors can acquire licenses through **nodes**, giving them the tools and authority to contribute directly to the ecosystem. **Players**, in turn, are rewarded with **FMT tokens**, fueling a dynamic and vibrant token economy. Over time, the platform will evolve from a structured system into a fully decentralized ecosystem governed by the ambassador **DAO**, ensuring community-driven growth and innovation. Let's dive deeper into the basic FINGERMONKEYS features.

AMBASSADORS

Ambassadors are passionate members of the gaming community who have purchased the FingerMonkeys nodes, granting them the license to display their games on the FingerMonkeys platform. This licensing system ensures that only individuals who have actively contributed to the ecosystem and hold a stake in its success can participate as content creators. By making this commitment, ambassadors are aligned with the best interests of the community, fostering a sense of responsibility and dedication to the platform's growth. They bring creativity and innovation by uploading simple mini games, offering players engaging experiences while contributing to a thriving token-based economy.

FINGERMONKEYS TOKEN

The FingerMonkeys token is the primary currency of the platform, earned by players as they engage with games. It drives the project's economy, enabling transactions, rewarding participation, and unlocking numerous utilities. As the community grows, new utilities will be introduced, expanding the token's role and further integrating it into the ecosystem, both in gameplay and within the broader FingerMonkeys community.

FINGERMONKEYS IN THE NUTSHELL

The FingerMonkeys token, fundamental to the ecosystem, is used for:

- **Currency:** Tokens are used to purchase in-game items and participate in key activities.
- **Staking:** Tokens can be staked for rewards and other community benefits.

FINGERMONKEYS NODES

FingerMonkeys NODES (aka lands) serve a dual role within the ecosystem. They function as licenses, enabling ambassadors to upload and showcase their games on the platform, while also holding potential for future utility development. These nodes empower ambassadors and enhance the player experience by adding extra layers of utility, engagement, and long-term value to the ecosystem.

THE FINGERMONKEYS AMBASSADOR DAO

The FingerMonkeys ambassador DAO empowers node holders to shape the platform's development. The governance is led by core stakeholders - node holders and the FingerMonkeys team - who are most invested in the platform's development.

PLATFORM'S REVENUE STREAMS:

- **The licensing fees:** Paid through nodes, granting the right to upload games to the platform.
- **In-Game Advertising:** Brands can advertise directly within the game, creating an engaging and integrated experience for players and the community.
- **Marketplace Fees:** A platform where players can trade digital assets, including NFTs and game-specific items, with transaction fees collected on each sale to support platform maintenance and growth.

EXECUTIVE SUMMARY

Finger Monkeys represents a groundbreaking advancement in the Play-to-Earn (P2E) gaming sector. By integrating innovative blockchain technology with engaging gameplay, the project seeks to provide users with both entertainment and real-world value. The platform offers a comprehensive ecosystem that rewards players, fosters community growth, and ensures sustainable economic models.

Finger Monkeys is designed to be accessible, rewarding, and inclusive, catering to both casual gamers and serious blockchain enthusiasts. This whitepaper outlines the vision, mission, and structure of the Finger Monkeys ecosystem, providing detailed insights into its core features, tokenomics, roadmap, and long-term strategies.

VISION AND MISSION

VISION

To become a leading force in the Play-to-Earn industry by offering a gaming ecosystem where players are rewarded fairly and consistently for their engagement, all while enjoying an immersive experience.

MISSION

To create an inclusive platform that empowers users through interactive gameplay, community-driven development, and decentralized governance. Finger Monkeys is committed to delivering value to its players, investors, and partners while maintaining transparency, security, and innovation.

CORE FEATURES

1. GAMING ECOSYSTEM

The Finger Monkeys platform is built around a robust gaming ecosystem that prioritizes user engagement and rewards.

-Mini HTML5 Games

The platform hosts a diverse array of HTML5 games designed to be highly accessible. Players can enjoy these games across devices without the need for complex installations.

-Play-to-Earn Mechanics

Players can earn \$FMT tokens by achieving milestones, completing quests, participating in tournaments, and leveling up their profiles. This ensures that every action taken on the platform is potentially rewarding.

-Task and Referral Systems

Community-driven growth is facilitated by rewarding users who complete daily tasks and refer new players. This feature not only boosts engagement but also promotes the organic expansion of the platform.

2. GUARDIANS OF FINGER MONKEYS CAMPAIGN

-The "Guardians of FingerMonkeys" campaign is a flagship initiative designed to introduce players to the platform's potential.

-Engaging Challenges

Players assume the role of 'Guardians,' embarking on quests and challenges to level up their profiles and earn exclusive in-game and on-chain rewards.

-Leaderboards and Competitions

Regularly updated leaderboards incentivize competitive gameplay. Weekly and daily competitions offer additional rewards, fostering an active and engaged community.

CORE FEATURES

3. LAND OWNERSHIP

Ownership of virtual LAND is a cornerstone of the Finger Monkeys ecosystem, offering both gameplay advantages and investment opportunities.

-Key Benefits

LAND owners are entitled to numerous benefits, including discounts on in-game assets, daily generation of \$FMT tokens, governance voting rights through the DAO, and a percentage of platform trading fees.

-Long-term Investment

LAND ownership serves as a lucrative investment for users seeking consistent revenue streams and long-term value appreciation.

4. FMGAMES PLATFORM

Upon completing the "Guardians of FingerMonkeys" campaign, the ecosystem transitions into FMGAMES, an advanced gaming hub.

- Expanding Gaming Options

FMGAMES hosts both branded and third-party games, ensuring a constant influx of new content.

- Community-Driven Development

Through governance mechanisms, users can influence which games are added and how the platform evolves.

FINGERMONKEYS THE NEW-AGE GAMING

The gaming industry has grown immensely over the past few decades, evolving from simple pixelated graphics to immersive virtual worlds.

However, with this rapid growth comes a series of challenges that developers must navigate to create engaging, sustainable, and innovative experiences. Whether it's maintaining player engagement, standing out in a saturated market, or finding meaningful ways to monetize, game developers constantly face obstacles that require creative solutions.

As the industry moves towards Web3 and blockchain integration, new opportunities and challenges arise, offering both potential and risks. In this ever-evolving landscape, it's essential to address the key problems facing developers in order to create games that resonate with players and stand the test of time.

FMGAMES platform:

Unique "tiktok" inspired user experience game platform with mini html5 games.

Ambassadors:

Game owners, creators, studios and contributors to the platform who upload games to engage their communities in the play-to-earn ecosystem. Need to be our node owner to own a license to participate as Ambassadors.

Players:

Players are the heart of the FingerMonkeys platform. FMgames players collect the FMT tokens, hold them, to enter weekly events and also unlocking tiered benefits and status levels based on their holdings.

1. How to Find a Community?

Mini games thrive on strong, engaged communities. The FingerMonkeys community journey begins with game creators who bring their existing communities to the platform. As these groups interact and grow, they gradually merge into a unified FingerMonkeys community. This approach follows the principles of organic marketing, leveraging existing networks to build a vibrant and connected ecosystem over time.

2. How to Stand Out Among Competitors?

At FingerMonkeys, we stand out by offering a TikTok-inspired gaming experience, where players seamlessly scroll through a variety of games rather than being tied to just one. This dynamic format ensures that gamers stay engaged, always having the option to start or end a new game based on their mood and preferences. Players can also participate in our play-to-earn model, choosing the games they enjoy the most at any given moment to earn rewards. What truly sets us apart is our ecosystem for games - a platform where diverse creators upload their mini games. This vibrant hub fosters creativity, variety, and a constantly evolving gaming landscape, keeping players entertained and engaged while supporting the broader gaming community.

3. How to Find a Sustainable Purpose in the Game?

Mini games often risk feeling repetitive and lacking a deeper purpose, limiting opportunities for further business development. At FingerMonkeys, we address this by building a thriving crypto economy and integrating the play-to-earn concept. Our play-to-earn model allows players to earn tokens as they progress and achieve milestones, creating tangible rewards that add real value to their gaming experience. Beyond gameplay, we empower our community through token-based voting, giving them a voice in shaping the project's direction and contributing to community-driven content creation. This approach fosters deeper connections, sustained engagement, and new opportunities for innovation within the FingerMonkeys ecosystem.

FINGERMONKEYS THE COMMUNITY MEMBERS

The FingerMonkeys community is built on two key roles:

- players
- ambassadors (the game owners).

Each member contributes to the ecosystem with a unique purpose, tied together by crypto-based membership tokens or node ownership, which grant access to different levels of engagement and utility.

The Players

Players are the heart of the FingerMonkeys platform, joining for entertainment and rewards through the play-to-earn system. Designed with a TikTok-like experience, the games offer quick, engaging gameplay tailored to our target audience's preferences. Players collect the FMT tokens, unlocking tiered benefits and status levels based on their holdings. Starting as followers of game creators, players can grow into active community members, fostering deeper connections and loyalty.

Ambassadors: The Game Owners

Game owners are creators and contributors to the platform who upload games to engage their communities in the play-to-earn ecosystem. As node holders, they possess the license to host games on the platform, adding value to the growing FingerMonkeys community. Game approvals are managed transparently through the FingerMonkeys DAO, ensuring quality and alignment with community standards.

This dynamic structure unites players and creators in a thriving, purpose-driven ecosystem where everyone has a role in shaping the platform's future.

FINGERMONKEYS: BUILDING A DEEPLY CONNECTED DIGITAL COMMUNITY

At FingerMonkeys, we aim to create a truly connected digital community, despite the anonymity of its members.

To achieve this, we focus on three key elements: a common goal, a common currency, and a decision-making process. These elements are essential for fostering unity, engagement, and autonomy within our community.

Common Goal

A shared vision is vital for uniting our global members. By defining both our role within the broader digital landscape and our internal mission, we ensure a cohesive and purpose-driven community.

Common Currency

A community's currency is crucial for independence and cohesion. Our token not only facilitates exchanges but also reflects our collective efforts toward our shared goal. It is also used for voting and earning, further strengthening the community's engagement.

Decision-Making Process

A Decentralized Autonomous Organization (DAO) provides an ideal governance model. Through transparent and fair decision-making, DAOs allow us to involve the key stakeholders in shaping the future of the community.

THE FINGERMONKEYS GOALS

Finger monkeys always stay connected in small groups. They live, play, and thrive together because this is their way of life. Do you see the resemblance? Our community aims to reflect this connected, cooperative existence, fostering strong bonds and collaborative efforts among our members.

- **THE PLAY TO EARN CONCEPT**

One of the core concepts of the project is the "Play and Earn" concept, also known as "Play-to-Earn" (P2E), which represents a revolutionary shift in the gaming industry. This model allows players to earn real-world value through their in-game activities, usually in the form of cryptocurrency and other digital assets.

The Play and Earn model is more than just a new way to play games; it is a transformative force that offers financial opportunities and fosters global communities. By enabling players to earn from their gaming activities, it addresses social inequalities and provides a pathway to financial independence for many.

For instance, Axie Infinity has emerged as a groundbreaking force in the gaming world. It has transcended the traditional boundaries of gaming, emerging as a powerful tool for social and economic empowerment. It has significantly impacted underdeveloped countries, where traditional job opportunities may be scarce or low-paying. In countries like the Philippines, Venezuela, and Brazil, Axie Infinity has become a major source of income for many. Its impact in underdeveloped countries underscores the potential of Play-to-Earn models to provide meaningful income opportunities and foster community spirit. The FingerMonkeys community aims to connect not only through financial initiatives but also by pursuing socially significant goals.

THE FINGERMONKEYS GOALS

- **THE CREATION OF THE INFLUENCER COMMUNITY**

Externally, the FingerMonkeys community aims to influence and promote specific movements, goals, tokens, and products aligned with our values.

The games and missions we engage in also create a platform/space for promotion and marketing where we will be able to endorse initiatives that resonate with our community values and add extra utility to our token. All promotional activities will be subject to community voting to ensure they align with our core principles.

This approach helps us connect with other communities and expand our network. In the future, we envision creating micro-influencers within our community who will advocate for specific movements and develop proposals, further strengthening our impact and reach.

The trend of micro-influencers and the growth of crypto communities are intricately connected, creating a dynamic and interactive ecosystem. Micro-influencers provide valuable education, build trust, and foster community engagement within the crypto space, while crypto projects offer content opportunities and financial incentives. This relationship is likely to continue evolving, further solidifying the role of micro-influencers as key players in the world of cryptocurrency.

THE FINGERMONKEYS TOKEN

The FingerMonkeys token is the native token of our project. It is the lifeblood of our ecosystem, greatly enhancing its functionality. With the unique ability to unite a global digital community around a shared vision, application, and cause, it is underpinned by key blockchain features like immutability and transparency. This fosters a transparent business environment and promotes active community engagement.

General Token Information

Token Name: FMT (FingerMonkeys Token)

Symbol: FMT Total

Supply: 1,000,000,000 FMT

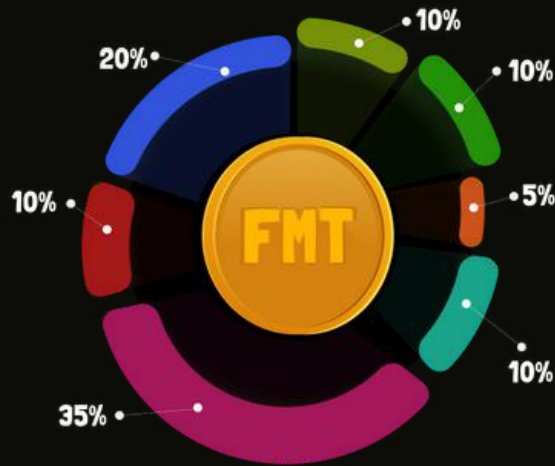

Decimal Places: 18

Network: BASE NETWORK (ERC20)

FINGERMONKEYS TOKENOMICS

| Section | | \$FMT Tokens | Address | Description |
|--------------------------------|-----|--------------|------------------------------------|--------------------------------------|

FINGERMONKEYS TOKEN UTILITIES

The multifaceted utilities of the FingerMonkeys token integrate seamlessly into the project's ecosystem. The token is more than just an asset; it's a pivotal component that enhances user experience, connects community members to premium gaming features and opportunities, and evolves the application into a dynamic, interactive gaming environment.

In-Game Purchases

Use FMT tokens to buy exclusive in-game items, character upgrades, power-ups, and customization features across our gaming platform.

Join Game Events

Compete in skill-based events and tournaments by using FMT tokens as entry fees, with prize pools distributed among top performers.

Staking for Rewards

Stake your FMT tokens to earn rewards, unlock special benefits, and increase your Game Airdrop Power (GAP), boosting your earnings during airdrop events.

Governance Voting

FMT holders can participate in decision-making by voting on key ecosystem developments, game additions, and platform upgrades.

Game Developer Licenses

Developers can use FMT tokens to purchase licenses and integrate their games into the FmGames.io platform, tapping into a growing player base.

Game License Marketplace

FMT tokens will be the exclusive currency for purchasing game licenses, allowing third-party platforms or businesses to acquire rights to FingerMonkeys-developed games.

FINGERMONKEYS TOKEN UTILITIES

NODE (aka Land) Ownership & Rewards

Holding LAND in the FingerMonkeys metaverse allows users to generate daily FMT tokens, access airdrop benefits, and participate in exclusive events.

Referral Rewards

Earn FMT tokens by referring new players or LAND buyers, with bonuses scaling based on your level and the level of the referred purchase.

Exclusive NFT & Asset Sales

FMT tokens can be used to purchase limited-edition NFTs, rare skins, and digital assets, giving holders access to unique collectibles.

Power-Ups & Boosts

Use FMT tokens to activate temporary in-game boosts, experience multipliers, or speed up crafting and upgrade processes.

VIP Membership & Perks

FMT holders can unlock VIP status, granting them priority access to special events, exclusive game modes, and private beta tests.

Marketplace Transactions

Trade in-game assets, NFTs, and digital goods on the FingerMonkeys marketplace using FMT tokens as the primary currency.

Game Modding & Customization

Enable modding support where players or creators can use FMT to unlock and integrate new game features, skins, or custom levels.

Community-Driven Content Fund

A portion of FMT tokens can be allocated to fund community-created content, such as new game expansions, skins, or in-game features, with creators rewarded in FMT

FINGERMONKEYS AMBASSADORS DAO

THE AMBASSADOR DAO

The FingerMonkeys DAO is a Web3 organization central to governing the FingerMonkeys project. It acts as the central platform where ambassadors, who hold licensing nodes for game uploads, exercise their voting power to guide the project's growth and evolution.

Becoming a Member of the FingerMonkeys DAO

FingerMonkeys ambassadors that hold the nodes and can upload the games, are core contributors to the ecosystem. Their involvement in decision-making is essential, particularly in determining which games join the platform. To become part of the DAO, individuals must first acquire FingerMonkeys nodes, granting them a voice in the project's future.

Governance and Collaboration

Holding FingerMonkeys nodes provides access to the DAO's governance process. Members can discuss, vote on significant project developments, and track voting histories. Blockchain technology enhances this system by linking funding contributions to meaningful voting rights, giving backers an influential role in critical decisions.

Engagement in the DAO

The FingerMonkeys DAO fosters collaboration and empowers members to shape the project's vision. A unified DAO structure ensures deep member engagement, particularly at the ambassador level. Through their nodes, members participate in governance, leveraging blockchain technology to create a transparent and dynamic environment. This participatory approach aligns funding with decision-making, embodying blockchain's transformative potential for business and community building.

THE FINGERMONKEYS INITIATIVE: GAMING AND BLOCKCHAIN

FingerMonkeys leverage blockchain technology to create a global, decentralized ecosystem for gaming and beyond.

Rooted in blockchain's origins as a response to centralized power, this initiative embraces transparency, security, and individual empowerment.

Decentralization and Power Distribution

Blockchain enables decentralized platforms where players can trade, interact, and participate without centralized authorities. This creates trustless environments that secure game assets and achievements while giving players ownership and control, democratizing the gaming experience.

Global Community and Movement

Blockchain's borderless nature aligns perfectly with the global gaming community. Players can join forces, compete, and trade assets worldwide without friction, fostering vibrant and dynamic global interactions.

DAOs and Business Development

At FingerMonkeys, business development happens within a Decentralized Autonomous Organization (DAO), where smart contracts empower the ambassador community to drive decisions. This ensures collective ownership and innovation, supporting the development of inclusive and groundbreaking gaming projects.

FINGERMONKEYS REVENUE STREAMS

The FingerMonkeys project is designed to provide a sustainable and innovative business ecosystem.

By leveraging cutting-edge technology and community engagement, FingerMonkeys offer multiple revenue streams that ensure the project's growth and long-term success. These revenue streams not only support the development of new features and content but also enhance the overall user experience.

- **The licensing fees:** A key revenue stream for the FingerMonkeys project comes from licensing fees paid through nodes to upload games onto the platform. This model ensures consistent income, fosters sustainable growth, and encourages node holders to actively contribute to the ecosystem's success.
- **In-Game Advertising:** Within the FingerMonkeys games, in-game advertising integrates seamlessly into the gaming environment. Brands can engage with players through dynamic and immersive ad placements, enhancing visibility and interaction while generating revenue for the platform.
- **Marketplace Fees:** A platform where players can trade digital assets, including NFTs and game-specific items, with transaction fees collected on each sale to support platform maintenance and growth.

FINGERMONKEYS ROADMAP

2024

Q1-Q2

- Market research
- Project concept
- Expanding Dev support Team
- Preparing all strategies

2024

Q3

- Smart contracts & crafting development
- Official website creation
- Graphic designs of main characters
- Whitepaper 1.0
- FmGames platform development start

2024

Q4

- dApp & token deployment on BASE
- Massive T1 marketing campaigns
- Whitepaper 1.1
- TG Mini App Game Launch
- Alpha Game Release

2025

Q1-Q2

- FM-NODES Sale Launch
- Beta Game Platform Release
- Massive marketing campaigns (Q1 & Q2)
- Community expansion
- Win100k Giveaway Starts
- 1st Weekly FmGames Event (beta)
- 1st Airdrop Event
- Token DEX Launch (Q2)
- CEX Listing (Tier2 & Tier3 following Tier1)

2025

Q3-Q4

- 1.0 Game Release
- Massive marketing campaigns
- Community & users growth to scale platforms
- More CEX listing announcements
- FM NFT Marketplace (official launch)
- Adding 3rd party creators mini games to FmGames platform offering them SDK and API's
- 2nd Airdrop Event

FINGERMONKEYS

TECHNICAL SPECIFICS

TECHNICAL SPECIFICS

- **Frontend:** ReactJs is used to build intuitive user interfaces for seamless interaction with the Base Network, utilizing ethers.js for blockchain communication.
- **Blockchain:** Base leverages the power of the Ethereum Layer 2 ecosystem, built on Optimistic Rollups, providing high throughput and low-cost transactions while maintaining the security and decentralization of the Ethereum mainnet
- **FMT Token:** An ERC-20 token on the Base network, preminted and designed with custom functionalities such as burning, pausing, and governance-based voting through smart contracts and Base-compatible frameworks.
- **Staking:** Provides flexible staking options that enable token holders to participate in governance or earn rewards by locking their tokens within the Base ecosystem.
- **DAO:** Operates as a decentralized autonomous organization utilizing Base-compatible governance frameworks, ensuring transparent, community-driven decision-making with on-chain proposals and voting.
- **Base Network:** A Layer 2 blockchain built on Ethereum, designed for scalability, low transaction costs, and developer-friendly infrastructure. It combines Optimism's Optimistic Rollups with Ethereum's security, making Base an ideal platform for decentralized applications.

CONCLUSION

Finger Monkeys is set to revolutionize the Play-to-Earn gaming landscape by combining innovative technology, community-driven development, and robust reward systems. By fostering a symbiotic relationship between players, investors, and developers, the platform aims to create a sustainable and engaging ecosystem that redefines how we view online gaming.

“Finger Monkeys is not just a project; it is a movement.”

Join us in shaping the future of gaming.
